Dr. V.M. George, Mgr. E. W. Le Fever, M. D.

BUILDS CURIOUS TOMB.

A San Francisco Millionaire Is Opposed to Incensing Bodies in Coffins.

Henry Root, a rich civil engineer of San Francisco, has had a curious tomb constructed in the village of Williston, Vt. In it the bodies are to be incensed in coffins and are to be subject to a natural process of returning to dust.

The tomb stands on a large lot adjoining the village cemetery. The vault will hold 15 bodies, each compartment being a tomb in itself. The intention is to place a body on a marble slab; with the closing of the doors a dry, light chamber is secured, and the body, being surrounded with dry air, will undergo the natural process of decomposition. There are two doors to each chamber and when a body has been placed therein both are closed. There is a space between the inner and the outer doors and extending upward from this space is a passage. If it is the desire to permanently seal a chamber after burial this space is to be filled with cement or concrete, but in case the chamber is not to be sealed the space is to be filled with charcoal. Provision is made for the absorption of the gases of decomposition. The entrances to the chambers are made attractive with tablets and ornamental work. The structure is built of cement, but a short distance away it resembles granite.

People for miles about have thronged to the village to view the curious tomb and last week Mayor Robert Roberts and a delegation of aldermen from Burlington visited Williston and inspected the vault with a view of recommending the constructing of a similar one by the city of Burlington. Mr. Root designed the vault and personally superintended the work of construction.

TO FOREIGN GOVERNMENTS.

Large Sales Made by American Exporters—Markets Latest Development in Our Trade.

Large sales to foreign governments represent the latest development in American export trade. Among the latest shipments on government contract is one of 400 freight cars to Chili for use on the government roads. The American Car and Foundry company filled this order. This company has also recently sent 63 passenger coaches to New Zealand on a government order.

One of the great steel companies has just completed a contract with the Japanese government for 10,000 tons of 60-pound steel rails for use on the imperial railroads. The Baldwin locomotive works shipped 15 locomotives to Africa this month upon order from the Cape government. Another American concern has sent ten locomotives to the Cape government.

The demand for American pneumatic devices of all descriptions is developing in all parts, notwithstanding the high price maintained by manufacturers. Large orders from the German state railways have been placed and shipments are being made as rapidly as possible. Heavy contracts for the same class of goods have been placed by Japan for the equipment of new dock yards and arsenals.

A complete dredging outfit, purchased by a dredging company which operates on the west coast of Africa, 600 miles from Accra, has recently been shipped. The purchase price was \$20,000, and the freight charges amount to nearly \$4,000.

TO BE A DUCHESS.

Formal Announcement of Miss Astor's Engagement to the Duke of Roxburgh.

The engagement of the duke of Roxburgh to Miss Pauline Astor, daughter of W. W. Astor, has been definitely arranged, and the wedding will take place some time next summer.

Miss Astor is the richest heiress in England, but the young duke, to whom she is engaged, can by no means be called a fortune hunter. He is a manly young fellow of 24, and is the possessor of several ancestral castles, besides 65,000 acres of land. His name is John Innes Ker. Miss Astor is 21 years old, not a beauty, but attractive and accomplished. She and the duke were thrown together a great deal in the summer of 1898, and Miss Astor paid a long visit to Floors castle, one of the ancestral seats of the Roxburghs, just on the border of Scotland. Her father's wealth is estimated at \$200,000,000. He is the richest of the Astors, and has become a citizen of England.

AUTOMOBILE BEATS TRAIN.

This Startling Feat Performed in Italy as the Result of a Dispute.

Sig. Marino Torlonia has just beaten the express train to Civita Vecchia on his automobile. The feat was the outcome of a friendly dispute between Sig. Marino Torlonia and Commendatore Silvestrelli. All the chaffeurs in Rome watched the result.

Sig. Torlonia started at the same time as the express, and, although greatly impeded by traffic, performed the 70 kilometers (43 1/2 miles) in time to alight and greet Commendatore Silvestrelli on his descending from the train at Civita Vecchia.

An Unselfish Duke.

The duke of York has even gone so far in his desire to cement the new friendship between England and Germany as to have the German measles. As an exhibition of unselfish earnestness in promoting the cause of civilization, remarks the Chicago Times-Herald, this is almost unparalleled.

STRENGTH

In the Market Was Confined to a Very Few Stocks.

By Associated Press.

New York, Feb. 19.—There was an element among professional operators on the stock exchange which worked for a rally today, on the theory that yesterday's selling was largely due to operations for the bear account and that vigorous support of the market would drive these bears to cover.

Maneuvers were entirely without success especially in early dealings, as all the market's strength was confined to a very few stocks and was not long maintained, showing no signs of the recent large general demand or of operations by large banking and financial institutions, which was the backbone of the market for a long time. Obviously none but professional operators were interested to any great extent in the day's transactions.

Steel stocks were all feverish and unsettled but generally weakened during the course of the day. Some uneasiness was due to the re-opening of the wages question in the anthracite region, the present agreement extending only to April first. Coalers in consequence were especially weak.

Delaware and Hudson was erratic, closing with a net loss of 2 1/2 points. Southwesterns were all notably weak, dealing from 1 to 2 1/2. There were severe losses in Great Northern Preferred, General Electric, and Smelting Stocks.

There was an upward turn in sugar but it did not hold.

Comparative firmness was shown by Union Pacific, Illinois Central, and, for a time, St. Paul, though that stock gave way at last.

There was a large buying again in Southern Pacific bonds but they lost most of their gain before the close and the general bond list was reactionary. The total sales were 801,900 shares. Government bonds unchanged.

Reported by Charles R. Richardson, Broker, 177 Front street.

—Samuel Gardner, who has served long and efficiently as night clerk at the St. Cloud Hotel will tender his resignation of the position some time this month and will take a trip to Washington and the East. Mr. Gardner will be succeeded by Mr. Millford Malloney, who is being instructed in the business of the hotel in order that he can take full charge of the accounts when the former leaves.

Invitations Issued.

The following invitations were issued by the Entertainment Committee of the Athletic Association Tuesday: "You are invited to attend the Fancy Dress Entertainment and Social given by the College Athletic Association On February 22nd, 1901. Come in costume if possible, but above all we desire your presence, "Yours Respectfully, "COMMITTEE."

The people of the city are responding most generously to the appeal of the Athletic Association for financial support in its present embarrassment and the largest attendance in years is expected at Andrews Hall Friday night. The affair promises to be one of great brilliancy and the play which will be presented will furnish entertainment for the evening.
